Summary

Current Software Engineer at start-up company Escavador. 3+ years experience specializing in the backend development, information retrieval, and machine learning. Super nerd, easy learner, Linux lover and proud KDE contributor that is always looking for new friends. Problem solver, interested in new challenges, and developing new tools.

Work Experience

Escavador

Salvador, Bahia, Brazil

SOFTWARE ENGINEER

Oct. 2018 - Present

- Designed a web crawler architecture for a system focused on information retrieval of Brazilian legal cases, which extracts millions of documents from different courts from Brazil.
- Implemented several API microservices using Python, asynchronous libraries and MySQL.
- Built scripts to extract juridical information from many governmental gazettes.
- Integrated search engines with support for machine learning ranking using vespa.ai.
- Built fully automated CI pipelines on Gitlab CI for containerized applications using Docker.

KDE Community

Remote

SOFTWARE DEVELOPER & CONTRIBUTOR

Dec. 2017 - Present

- Maintainer of “mark” project, a machine learning dataset builder.
- Improved SMART support and KAuth operation flow in KDE Partition Manager during Season of KDE 2018.
- Finished LVM Volume Group support in Calamares.
- Implemented full Software RAID support in KDE Partition Manager during Google Summer of Code 2018.
- Mentored students during Google Code-in 2018, helping them to complete tasks for KDE Partition Manager. Because of this contribution, I was selected as the mentor to represent KDE Community during GCi Summit in Google HQ (San Francisco, California).
- Mentor during Google Summer of Code 2019 in two projects: “Improving Khipu and Analitza” and “Port Authentication to Polkit-qt”.
- My patches to KDE Partition Manager and Calamares helped me to improve my skills with C++, C, Qt (widgets), CMake, SMART (libatasmart, smartctl), DBus, mdadm, dmraid, lvm and Linux partitioning tools.

Labrasoft - IFBA

Salvador, Bahia, Brazil

UNDERGRADUATE RESEARCH ASSISTANT

Aug. 2017 - Present

- Developed a simulated stock market to evaluate bots behaviour in decision-making processes using MQL5, MetaTrader and Python.
- Deployed object tracking algorithms based on Deep Learning approaches in embedded systems using Intel Movidius, Raspberry Pi and Python.
- Implemented a generative-adversarial model for image enhancement during Minimally Invasive Surgeries.

TecnoTRENDS

Salvador, Bahia, Brazil

SOFTWARE DEVELOPMENT INTERN

Oct. 2016 - Oct. 2017

- Developer of a module for an educational ERP system focused on elementary schools using C#, ASP.NET and SQL Server.
- Released versions from this module for all the elementary schools from the city of Feira de Santana, Bahia.
- Development of new features, graphical interfaces and SQL routines.

Honors & Awards

2018 **Grand Prize Winner**, Season of KDE 2018

Remote

2018 **Winner**, Innovative Challenge - IFBA Projects' Hotel

Salvador, Brazil

2017 **Gold Medalist**, ProgBASE 2017 - Competitive Programming Contest

C. das Almas, Brazil

2018 **Bronze Medalist**, 2nd Programming Contest of Bahia

Salvador, Brazil

Presentation

QtCon Brazil 2018

São Paulo, Brazil

PRESENTER FOR <COMPUTER VISION WITH QT QUICK AND OPENCV>

Nov. 2018

- Introduced how to integrate the OpenCV library with Qt Quick in mobile environments.

V Workshop Labrasoft-GPETEC

Salvador, Brazil

PRESENTER FOR <INTRODUCTION TO KERAS AND DEEP LEARNING MODELS>

Sep. 2018

- Explained about the Keras library, including an introduction to deep learning models, such as Convolutional Neural Networks, Autoencoders and Generative Adversarial Networks.

ERBASE - Encontro Regional de Computação Bahia-Alagoas-Sergipe

Aracaju, Brazil

PRESENTER FOR <ALPHA3 - EXPERT ADVISOR USING ARTIFICIAL NEURAL NETWORKS AND GENETIC ALGORITHMS>

Aug. 2018

- Explained about the Alpha3 project, which is an expert advisor to predict stock market trends based on neural networks and genetic algorithms.

IV Workshop Labrasoft-GPETEC

Salvador, Brazil

PRESENTER FOR <DATA SCIENCE WITH PYTHON>

Aug. 2017

- Introduced some data science topics and explained about some functionalities from Python libraries for data analysis, such as Pandas, NumPy and Scikit-Learn.

FLISOL 2017 - Festival Latino-americano de Software Livre

Salvador, Brazil

PRESENTER FOR <SHELL SCRIPT FOR BEGINNERS>

Apr. 2017

- Introduced the shell script language, including easy scripts and tools to improve their workflow while executing tasks using bash.

Publications

Alpha3 - Expert Advisor using Neural Networks and Genetic Algorithms to Predict Stock Market Trends

ERBASE 2018

CO-AUTHOR

Aug. 2018

- Paper published in ERBASE 2018. Explained about Alpha3 and its results on the prediction of the Brazilian stock market.

Organizer

2018 **Organizer**, WebMedia 2018

Salvador, Brazil

2018 **Organizer**, ADS-Integra & ADS-Gênero

Salvador, Brazil

2017 **Problem Writer**, IFBA Competitive Programming Contest

Salvador, Brazil

Education

IFBA (Federal Institute of Science, Education and Technology of Bahia)

Salvador, Brazil

B.TECH. IN SYSTEMS ANALYSIS AND DEVELOPMENT

Jun. 2016 - Present

- GPA: 8.6 / 10.0
- Relevant Coursework: Data Structures, Algorithms, Software Architecture, Design Patterns, Distributed Systems, Software Engineering, Object-Oriented Design.
- Technical Skills: C++ (3yrs), C, Python, Java, Git, Django, Qt, SQL.

College of the Rockies

Cranbrook, Canada

EXCHANGE STUDENT IN APPLIED SCIENCES

Jan. 2019 - May. 2019

- GPA: A-
- Relevant Coursework: Statistics, Probability, Mathematics.

SENAI - Serviço Nacional de Aprendizagem Industrial

Salvador, Brazil

CERTIFICATE PROGRAM, COMPUTER NETWORKS AND INFORMATION TECHNOLOGY

Jan. 2015 - Jul. 2016 (Interrupted)

- GPA: 9.5 / 10.0
- Relevant Coursework: Computer Networks, Servers Configuration, Linux and Windows Server, IT Management.
- Received a scholarship from SENAI to study on this program for free, but I had to interrupt it because of my university studies.

Extracurricular Activity

ProgIFBA - Competitive Programming Group at IFBA

Salvador, Brazil

MEMBER

Dec. 2016 - Jan. 2019

- Created a group focused on competitive programming studies at my university.
- Proposed some training sessions and participated in some contests that have happened in my city.

Sonata Project

Salvador, Brazil

MEMBER

Feb. 2018 - Apr. 2019

- Development of a mobile platform to help people on learning how to read music scores.
- Studied about music information retrieval.
- Worked with a team to submit this project to a innovative challenge at IFBA. Our project was the winner in this competition.
